Company Profile

2025

NERUOS.

## The summit of smart software solutions!

We build flexible, scalable platforms that solve real business challenges, empowering companies to grow, adapt, and lead in the digital world.

Whether you're a startup in need of a single application or a large corporation requiring complex solutions, we have you covered.

Your vision. Our code. One powerful future.

Let us help you create the ultimate digital project experience.
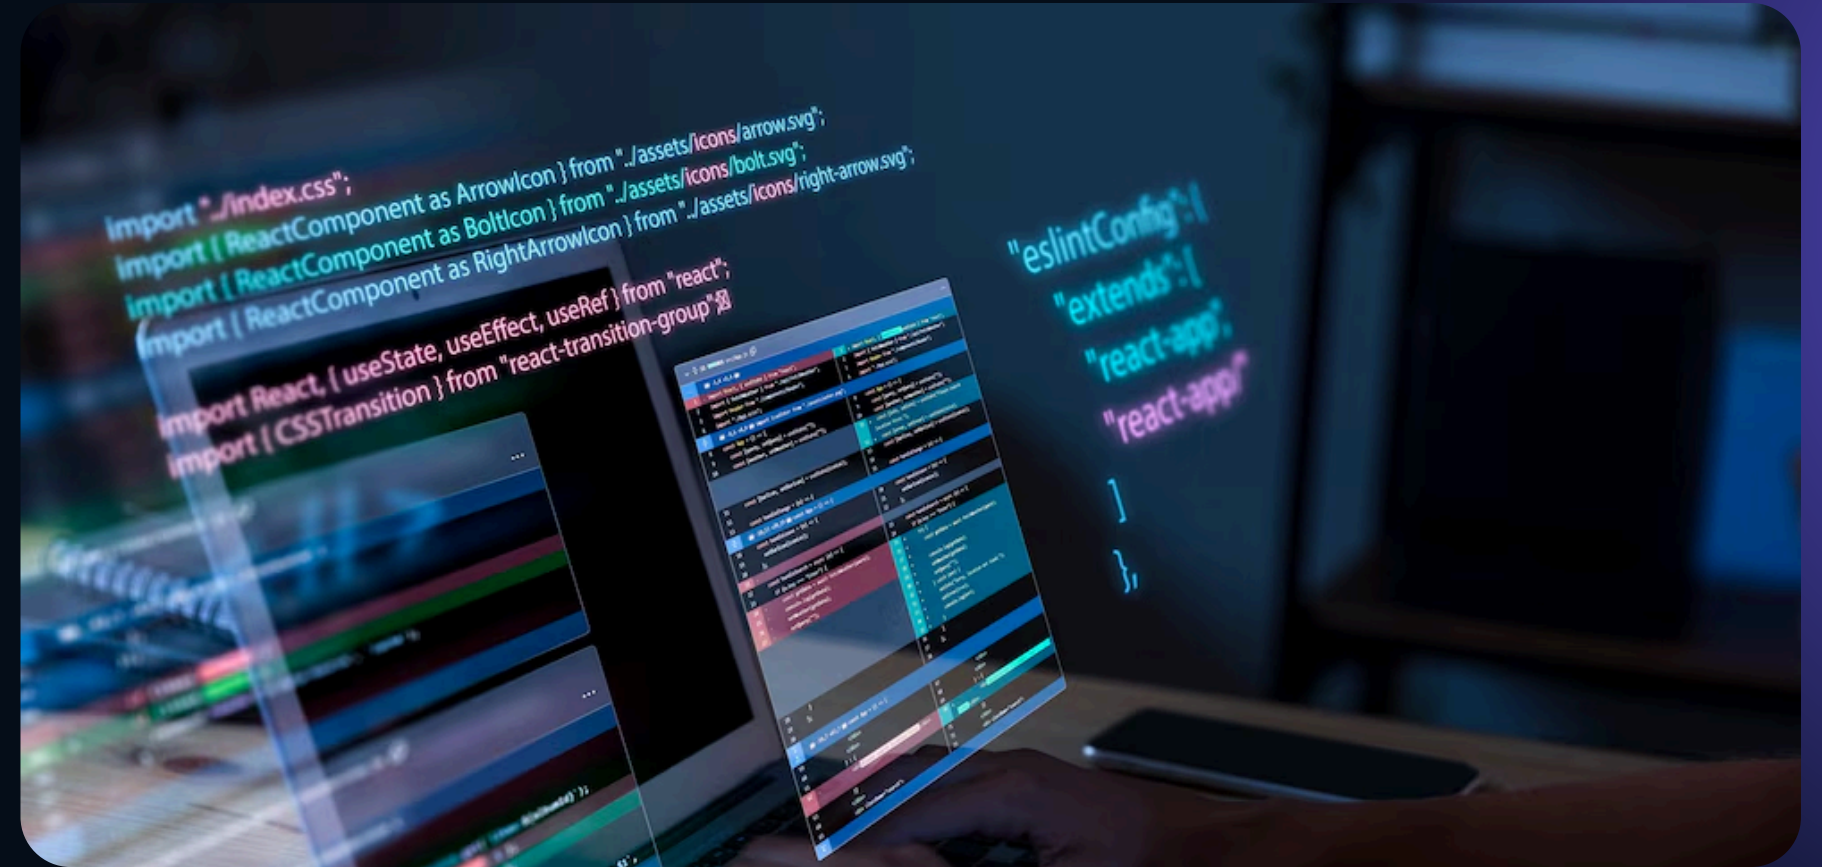

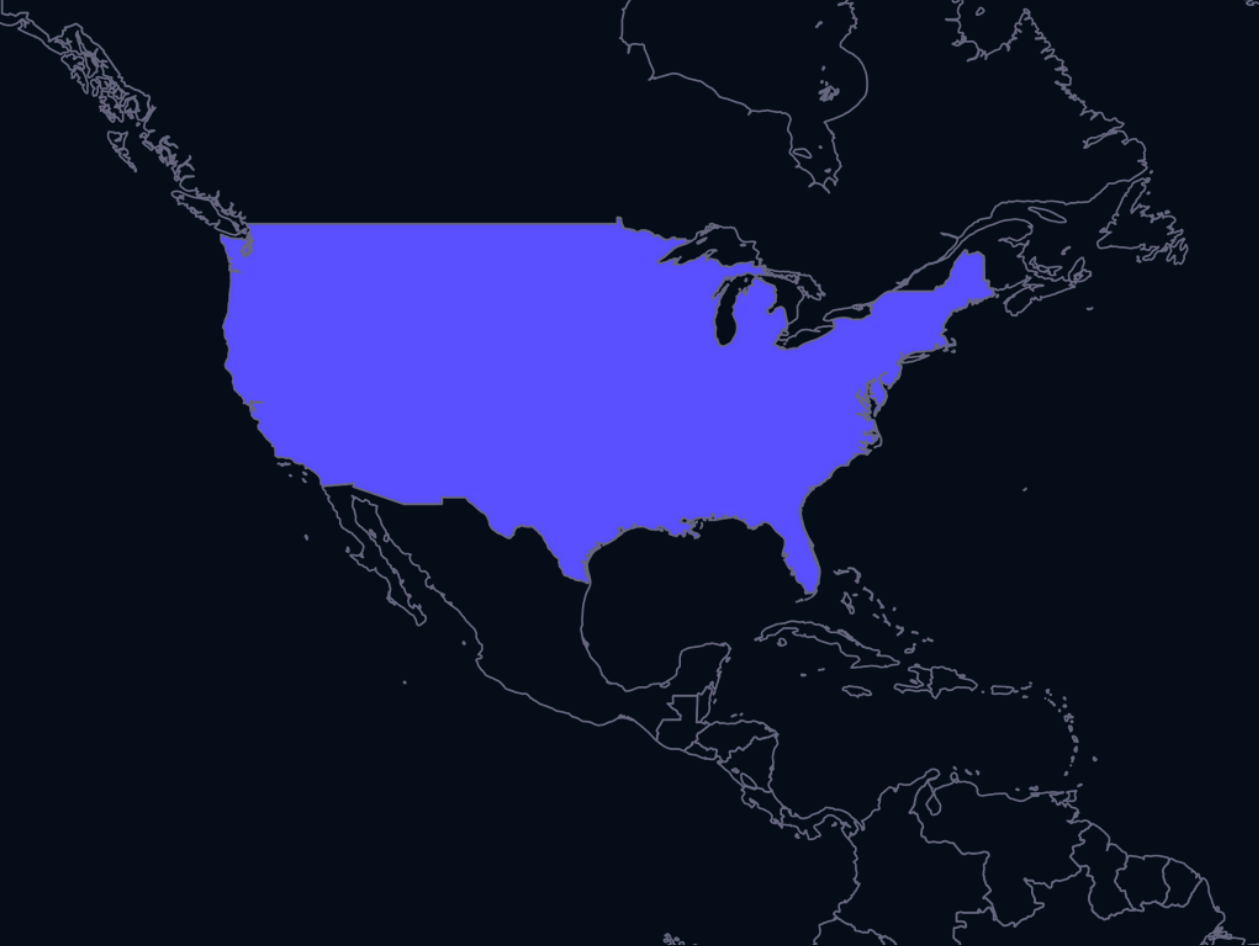

Who We Are

We engineer intelligent systems that don't just keep up, they stay ahead. Where others see complexity, we build clarity. Where markets shift, we deliver adaptability.

This isn't just software development – it's business evolution!

What Drives Us

We shape tomorrow's tech — today. By combining excellence with adaptability, we harness AI, cloud, and automation to align with your business goals.

More than solutions, we build partnerships that drive digital transformation and push boundaries across industries.

Where We're Going

From a bold idea to a global vision — our journey reflects a commitment to growth and innovation.

Our Services

Custom Software Development

Flexible, scalable software engineered from the ground up — tailored to your vision and goals.

- End-to-End Software Engineering
- Custom Enterprise Software Solutions
- MVP Design & Rapid Prototyping
- Software Architecture & System Design
- Cross-Platform Development

Web & Cloud Solutions

Scalable cloud-native web platforms built for speed, reliability, and seamless user experiences.

- Web Application Development
- Progressive Web Apps (PWA)
- Cloud-Native Application Development
- Cloud Migration & Optimization (AWS, GCP, Azure)
- API Development & 3rd-Party Integrations

Mobile App Development

High-performance apps for iOS and Android that engage users and drive value.

- IOS, Android & Flutter App Development
- AR-Powered Mobile Applications
- Mobile UI/UX Design
- App Store Hosting, Publishing & Support
- App Maintenance & Continuous Updates

AI, Machine Learning & Data Analytics

Unlock data-driven intelligence and automation to transform your business.

- AI-Powered Software Solutions
- Machine Learning Model Development
- Predictive Analytics & Business Intelligence
- Data Visualization Dashboards
- AI-Powered Chatbots & Automation

Cybersecurity & IT Infrastructure

Proactive protection and robust infrastructure to keep your digital ecosystem secure.

- Security Architecture & Design
- Security Audits & Compliance (GDPR, ISO, etc.)
- Data Encryption & Secure Authentication
- Threat Detection & Prevention Systems
- IT Infrastructure Consulting & Optimization
- Access Control Solutions

Automation & Digital Transformation

Smarter processes through automation, strategy, and cutting-edge transformation solutions.

- Workflow Automation Solutions
- Business Process Automation
- Digital Transformation Consulting
- IT Strategy & Tech Roadmap Planning

Our Services

IoT & Embedded Systems

Connect the physical and digital worlds with smart, sensor-driven systems.

- IoT Device Integration & Management
- Wearable Technology Solutions
- Sensor-Based Applications & Data Collection

Extended Reality (XR) Solutions

Immersive digital experiences that revolutionize training, engagement, and visualization.

- VR/AR/MR App Development
- VR Training Simulations
- Mixed Reality Experiences
- 3D Modeling & Environment Design

eCommerce Solutions

Custom eCommerce platforms built to scale, engage customers, and boost conversion.

- Custom eCommerce Platform Development
- Payment Gateway Integrations
- POS & Inventory Management Systems
- Loyalty Programs & Customer Analytics

Support, Maintenance & Consulting

Reliable long-term partnerships to keep your platforms running at their best.

- Software Enhancements & Upgrades
- Bug Fixes & Troubleshooting
- Ongoing Maintenance & 24/7 Technical Support
- IT Consulting & Advisory
- Performance Monitoring & Optimization

Emerging Tech & Future-Ready Services

Innovative technologies to help your business stay ahead of the curve.

- Generative AI Integrations (e.g., ChatGPT, DALL·E, etc.)
- Edge Computing & Real-Time Analytics
- Blockchain Solutions & Smart Contracts
- DevOps & CI/CD Pipeline Implementation
- Green IT & Sustainable Tech Solutions

Company Profile 2025

Our Team

Providing Comprehensive Digital Services to Streamline Your Business

Our team of experts is dedicated to delivering exceptional service, from consultation and feasibility studies to technical specifications and project management. Our services include graphic design, user experience optimization, development, and implementation, as well as support, maintenance, and continuous improvement.

At **NERUOS**, we take pride in our ability to simplify complex ideas and tasks into efficient, digital, and automated processes that will boost your business performance.

Case Studies

Samsung KSA ERP for Business Opportunity Management

- **Overview**: Designed a comprehensive ERP system to streamline Samsung KSA's partner management and business opportunity tracking.

- **Challenge**: Managing diverse business opportunities from multiple partners across regions with limited integration and data flow.

- **Solution**: Implemented a centralized ERP system for partner registration, real-time opportunity tracking, and automated reporting to enhance operational efficiency.

- **Technologies**: Django, React, PostgreSQL, AWS

- **Results**: **Reduced manual tracking efforts by 70%, providing a real-time view of all opportunities and reducing response time to partners by 30%**.
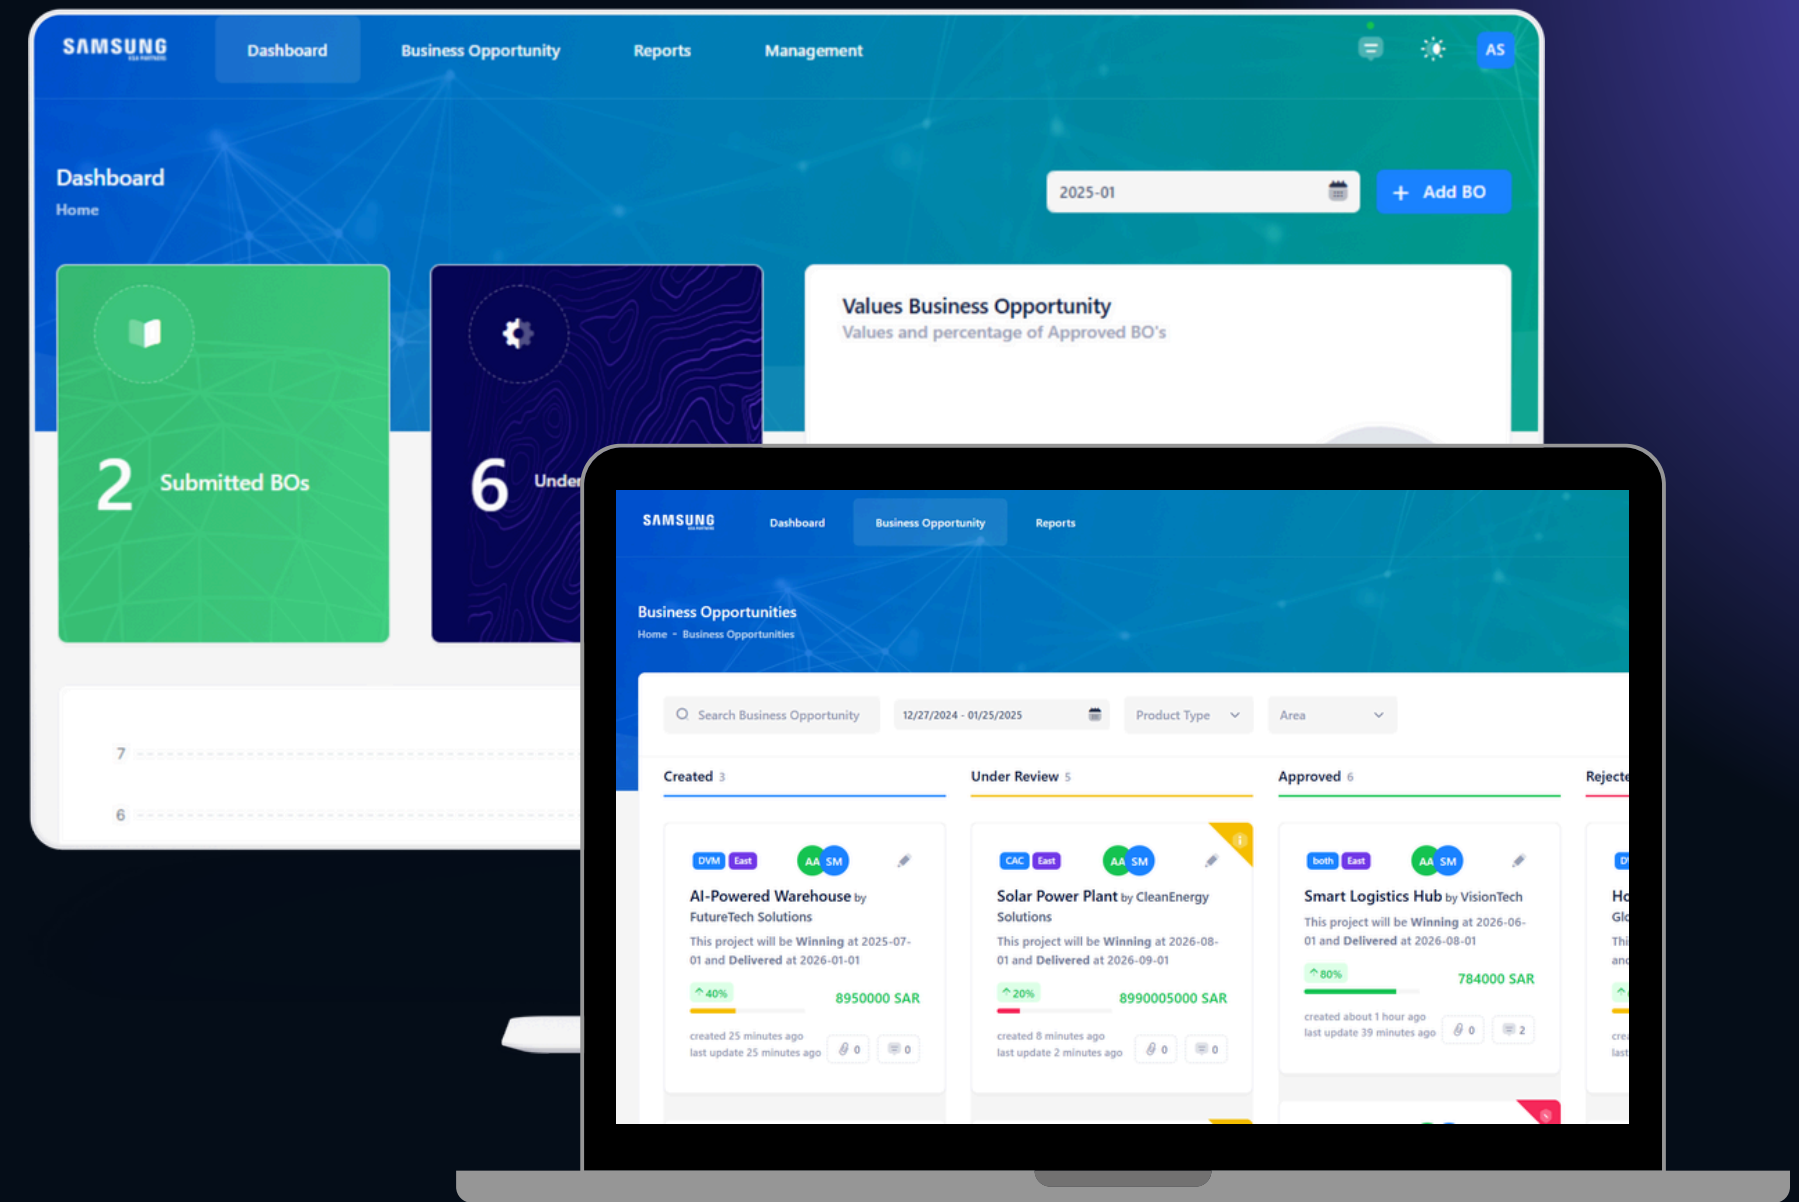

Case Studies

MTN MoMo Mobile Hosting

- **Overview:** Hosted two mobile apps for MTN MoMo (partner and customer) on the Apple App Store and Google Play Store, built by Huawei.

- **Challenge:** Ensuring seamless hosting, deployment, and compliance with app store guidelines while maintaining high security and uptime.

- **Solution:** Managed app submissions, updates, and ongoing 24/7 support to optimize performance and ensure smooth operations.

- **Technologies:** Play and Apple Store, Android, iOS.

- **Results: Launched on time with minimal downtime, improving app performance and user engagement by 25%, with 24/7 support ensuring continuous operations.**
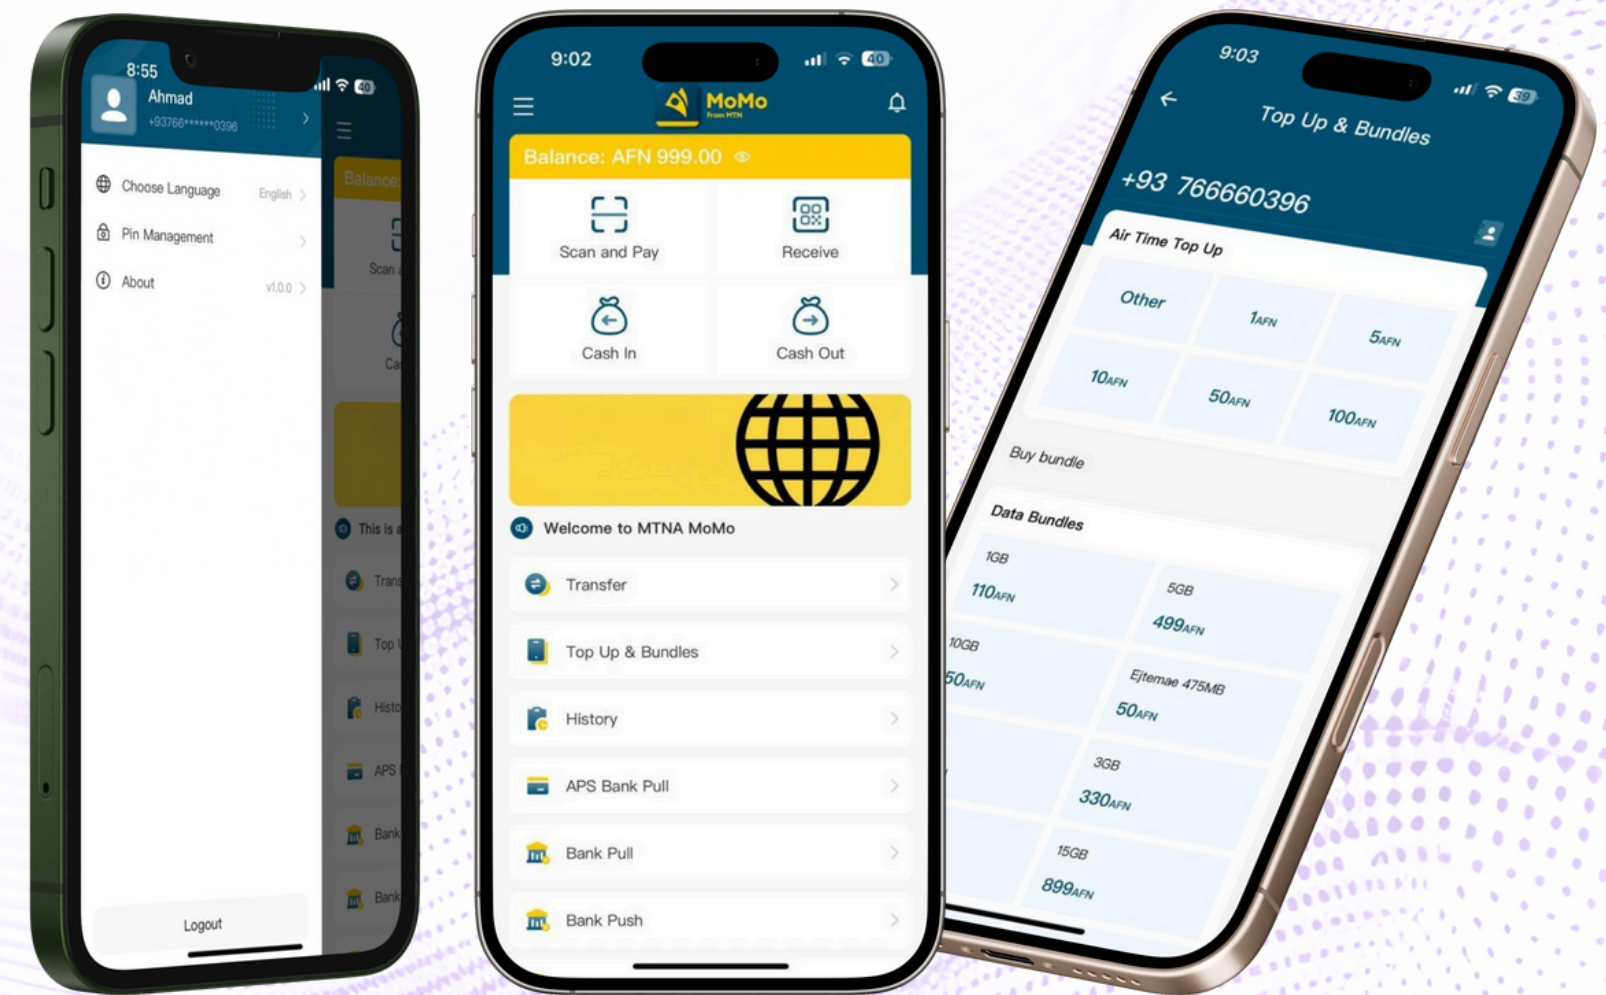

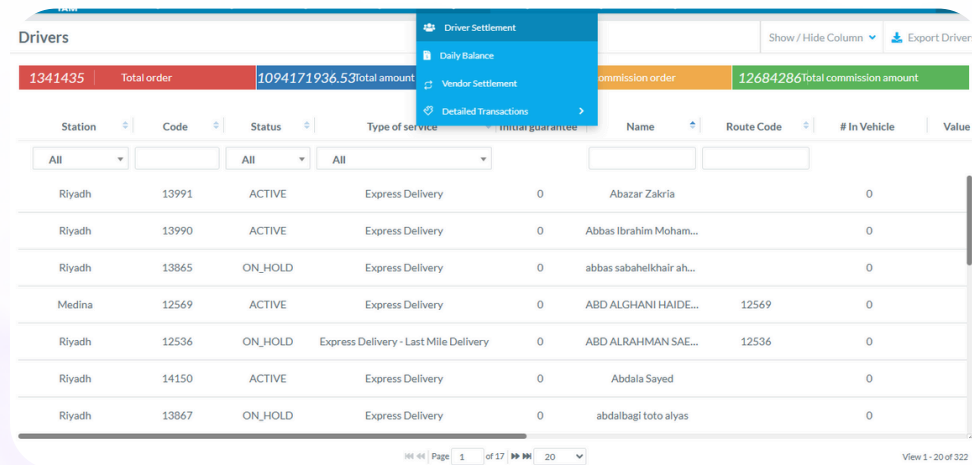

Case Studies

E-Archiving System for Government Entities

- **Overview:** Implemented a secure, centralized e-archiving system to digitize and manage government records across multiple departments.

- **Challenge:** Manual document handling led to inefficiencies, data loss risks, and difficulty in retrieving critical information across governmental offices.

- **Solution:** Developed a robust digital archiving platform integrated with AI to read and understand document content during searches. The system also supports physical document management through smart digital cabinets, ensuring hybrid archiving when needed.

- **Results: Improved document accessibility by 70%, reduced physical storage needs by 80%, and ensured long-term data preservation aligned with compliance and governance standards**.

Case Studies

Delivery System with Optimization & Warehouse Management

Developed a delivery and warehouse management system that optimized logistics and inventory tracking. The solution streamlined operations, reduced delivery times by 60%, and improved efficiency across the supply chain.
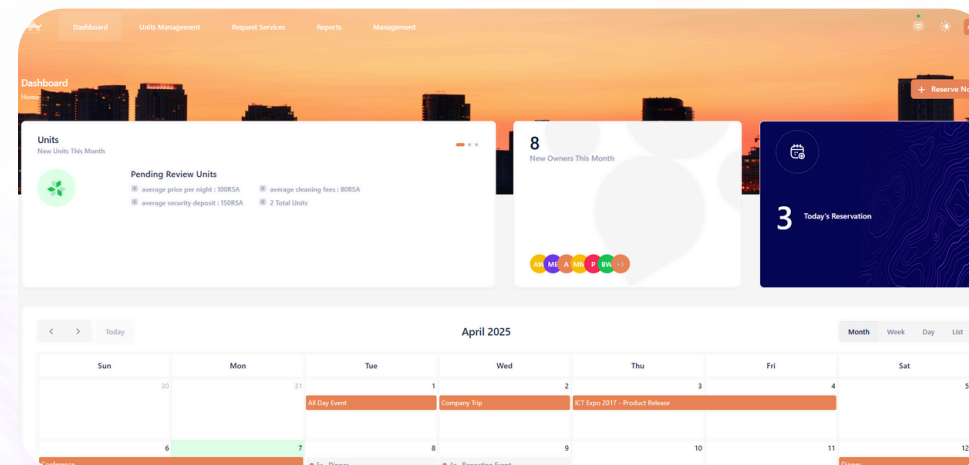

Property Management Solution for Yaminak

Built a platform for property owners to list and rent their units under Yaminak's services. The solution streamlined booking and payment processes, increasing rental bookings by 50% and reducing administrative workload.
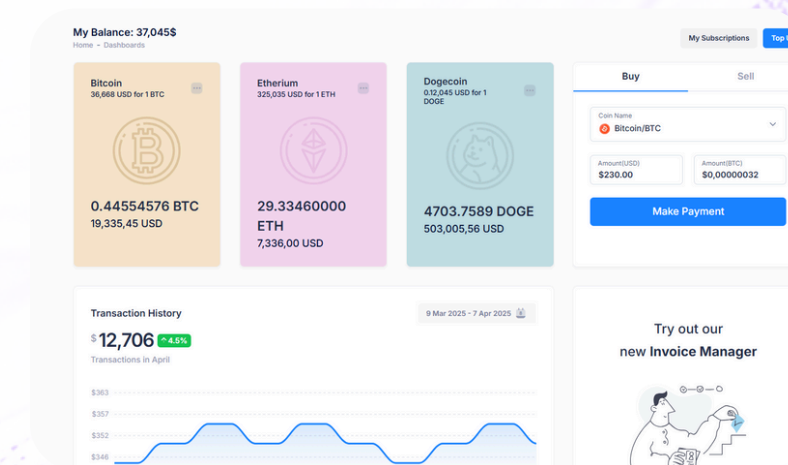

Payment Gateway for USDT

Developed a secure payment gateway for USDT transactions, allowing clients to save 2% on all payments. This system processed Millions per month and helped clients save 400,000$ while ensuring seamless payments.
